

Empress Technical News – August 2008

Free Trial Download Available

Empress Ultra Embedded v10.20 is now available for a 30 days free trial download on our web site. The process is simple, just go to our website at www.empress.com and click on Free Trial or click on the following link,

<http://www.empress.com/web-bin/ehsql/products/free-trial.ehtml>

fill in the brief form, select the applicable hardware and software operating system platform, submit the form and then you can download the Empress version you selected and an install guide in PDF. A key for the free trial will be emailed to you shortly.

Empress Ultra Embedded is the most powerful and cost-effective database management system available for organizations developing embedded, real-time applications using Real-Time operating systems such as VxWorks, Real Time Linux, Lynx O/S, MontaVista, QNX as well as UNIX, Linux, FreeBSD, Mac OS and Windows. It supports both process and thread/task based environments. Empress Ultra Embedded is compact, agile, maintenance-free and is suited for embedded systems, real-time application development, communications & networking, military & defense, process control and scientific & engineering applications.

Webinar Download Available

Our webinar on the new features of Empress Ultra Embedded v10.20 on July 28, 2008 was successfully and well attended by many Empress users. If you missed this webinar and would like to download a copy of this webinar please write your request to ivy.wong@empress.com.
